

GREEN ENERGY SOLUTIONS

Winton Global Homes is working with Integrated Power Systems (IPS) from Kelowna, BC to provide our customers with “Bronze”, “Silver” and “Gold” level power systems which give you an “off grid”, completely autonomous supply of electricity.

These systems come pre-assembled and are ready to be installed into any of our home or cottage packages.

Building with factory-framed floors, wall panel and engineered trusses is “green” because it cuts your framing labor costs by up to 40%, reduces lumber waste by 55% and reduces sheathing waste by 60%.

Winton Global Homes' Mt. Baker

“BRONZE”

4000 watt inverter with 540 watt solar array

- 4 135 watt solar panels
- 1 MPPT regulator charge controller
- 1 4000 watt 120/240 volt inverter/charger
- 8 sealed deep cycle batteries
- 1 battery monitor
- 1 lightning protector
- 1 top of pole mount

Price: \$13,844

“SILVER”

4000 watt inverter with 720 watt solar array

- 4 180 watt solar panels
- 1 MPPT regulator charge controller
- 1 4000 watt 120/240 volt inverter/charger
- 8 sealed deep cycle batteries
- 1 battery monitor
- 1 lightning protector
- 1 top of pole mount

Price: \$15,424

“GOLD”

4400 watt inverter with 1080 watt solar array

- 6 180 watt solar panels
- 1 MPPT regulator charge controller
- 1 4400 watt 120/240 volt inverter/charger
- 8 sealed deep cycle batteries
- 1 battery monitor
- 1 lightning protector
- 1 top of pole mount

Price: \$17,769

These power systems are all inclusive except for the pole to mount the panels on and the solar wire to run from the solar array to the system. You can install the power system yourself, or installation anywhere in BC, Alberta or the Yukon can be arranged through Integrated Power Systems (IPS).
